BEAUTY INNOVATION

OUR RESEARCH

The IX Essential Process

1. Safety of raw ingredients managed in exclusive lines
2. High purity HA content for duration and prevention of swelling
3. High viscoelasticity for exquisite lift up
4. Homogeneous particle implementation technology to complete exquisite molding
5. No detection of residual chemical catalyst substance through the complete crosslinking process
6. Aseptic manufacturing environment to prevent side effects
7. Less than 0.1 EU/ml of Endotoxin
8. Minimizes pain with the same pH and osmotic pressure as the human body
9. Optimized injection pressure for exquisite procedures

Brand Story

THE BEST THINGS COME IN SMALL PACKAGES

Enhance your features with Eloquence. Plump those lips, tighten your skin and accentuate your cheekbones with CE certified filler for any face. Be your own kind of beautiful with a little help from our tried and tested dermal fillers, aiming to rejuvenate your features. Say goodbye to taboo talks surrounding dermal fillers and welcome a new era where there is no stigma attached to cosmetic procedures.

Eloquence is a trustworthy provider of CE certified dermal filler using hyaluronic acid with a dense structure, achieving a consistent and volumised end result. In terms of ease of use, quality results and longevity Eloquence products cover it all as a safe, low risk product quality assessed to the highest of standards.

A high elasticity hyaluronic acid dermal filler to treat deep wrinkles, nasolabial folds and perfect for augmenting cheeks, chin, forehead, lips and nose. A thicker, longer lasting gel to create precise features.

A high performing hyaluronic acid dermal filler with the longevity to create the most perfect augmentation of the cheeks, chin, forehead, jawline or nose. Mould and maintain your features.

A lightweight hyaluronic acid dermal filler for superficial lines; crows feet, expression lines, beneath and above the eye. Creating a natural look, FINE will rejuvenate your face and give you a healthy glow.

Eloquence is manufactured according to "The 9 Essentials" process. R&D Center has our own 9 criteria to produce high-safety quality HA fillers which is strictly controlled than European standards. The hyaluronic acid filler Eloquence is produced according to the "The 9 Essentials" process promises an exquisite product that meets stringent safety standards.

The

 <p>Raw Material</p> <p>The safety is enhanced using only high-purity raw ingredients manufactured</p>	 <p>HA Concentration</p> <p>with HA 24mg, cross-linked mesomolecule to pursue the ideal maintenance period and the safety of the body, including swelling prevention.</p>	 <p>Viscoelasticity</p> <p>Elastic "HIVE structure" maintains an ideal viscoelasticity lifts the skin tissue.</p>
 <p>Aseptic Environment</p> <p>The Yongin plant, which was newly expanded in 2015, produces clean, pure, sterile products that have been thoroughly sterilized and removed infectious bacteria.</p>	<p>Eloquence keeps endotoxin below 0.1 EU/ml minimizing various side effects that may occur after the procedure.</p>  <p>Endotoxin</p>	 <p>Residual BDDE</p> <p>precise cleaning process to eliminate residual BDDE.</p>
<p>Eloquence produces a uniform particle size through its own Downing Process. Exquisite molding is completed with homogenized particle implementation technology.</p>	<p>Eloquence manufactured to be based on the same pH as my body and with osmotic pressure of about 300mOsmol/kg, which reduces the pain and discomfort of the patient after the procedure.</p>	 <p>Extrusion Force</p>
 <p>Particle Homogenization</p>	 <p>pH, osmolality</p>	<p>manages the optimized injection pressure for exquisite procedures to enhance the satisfaction of procedure.</p>

CERTIFICATE OF ANALYSIS

* Product name: eq 1g Lidocaine 5300 1.1ml
 * Batch No: YL818032
 * Manufacture date: Jan 31, 2018
 * Expiry date: Jan 30, 2022
 * Storage condition: Store at 2°C–20°C. Do not freeze. Protect from sunlight.

No.	Items	Specifications	Results
1	Description	Colorless, transparent, high viscous aqueous gel without visible foreign substance.	Suitable
2	Sodium Hyaluronate Identification	1) Glucuronic acid: Red color 2) N-acetyl-glucosamine: Red purple color	Suitable
3	Sodium Hyaluronate content	90.0% – 110.0% (21.6–26.4mg/ml)	105.68%
4	Lidocaine Hydrochloride Identification	RT difference: ±0.2min	Suitable
5	Lidocaine Hydrochloride content	90.0% – 110.0% (2.7–3.3mg/ml)	2.95 mg/ml
6	pH	6.0 – 7.5	6.84
7	Filling volume (1.1ml)	NLT 100%	1.13 ml
8	Oscurability	200 – 400 mOsm/kg	282.7mOsm/kg
9	Pushing force	50–30N	12.8 N
10	Heavy metals	Not darker than the control	Suitable
11	Residual crosslink agent (BDDE)	< 2 ppm	Not detected
12	Bacterial endotoxin	< 12.5 EU/ml	0.045 EU/ml
13	Sterility test	Negative	Negative

ZEEP((Zero Endotoxin & BDDE Entire Process) Technology

Eloquence keeps endotoxin below 0.1 EU/ml and no detection of residual BDDE minimizing various side effects that may occur after the procedure.

Endotoxin ▼ Inflammation ▼ / BDDE ▼ Allergic reaction ▼

Downing Process

Eloquence produces a uniform particle size through its own Downing Process. Exquisite procedures are possible without agglomeration through optimized injection pressure.

ELOQUENCE
 HYALURONIC ACID GEL WITH LIDOCAINE
 FINE DEEP 1.1ml

Exquisite Molding

01

FOREHEAD LINES
Use Eloquence FINE to give a natural result by filling superficial forehead lines.

02

GLABELLA LINES Get rid of those glabella lines (frown lines) with Eloquence FINE

03

CROWS FEET
Eloquence FINE can treat superficial lines, especially crows feet for a natural result.

04

TEAR THROUGHHS
Use Eloquence FINE as a thin gel to treat tear throughs and rejuvenate eyes

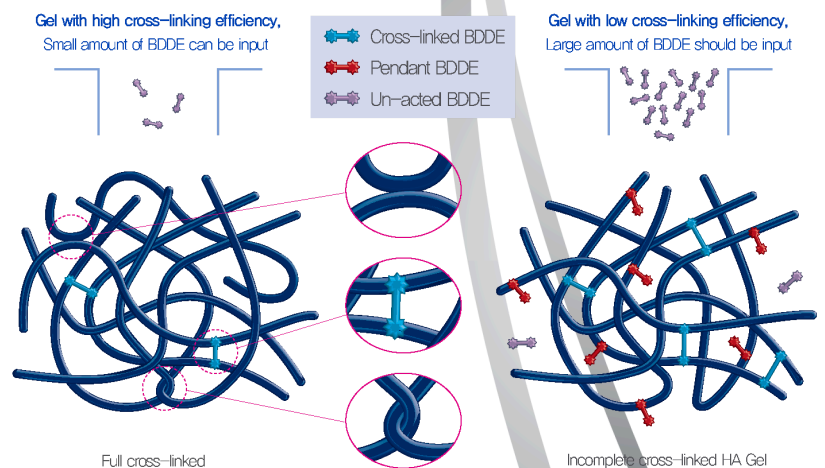

05

NOSE AUGMENTATION
Got lumps and bumps on your nose? Use Eloquence DEEP or SUB-Q for a long lasting result

Minimized BDDE Input

MoD (Degree of Modification)¹ is a safety verification requirement. "MoD = full cross-linked BDDE + Pendant type BDDE" by checking the modification ratio of HA through measurement of total amount of BDDE present in HA Gel. MoD of Eloquence is 1/6 lower than compare with other mono type filler, making it safer.

Maximization of Cross-linking Efficiency

Eloquence through the improved physical cross-link process to achieve a complete cross-linking level while minimizing the amount of BDDE as a chemical catalyst material, thereby manufacturing a gel with high viscoelastic properties.

High Viscoelasticity and Cohesiveness

Compared with Eloquence S500 and representative filler products, Eloquence x complex viscosity² and cohesiveness³ is equivalent to foreign A products which has more BDDE input and more outstanding compare with domestic B products, can make best clinical results.

Clinical Results

Safe HA filler e.p.t.q.increases the satisfaction of the operator and patient.

From the WSRS(Wrinkle Severity Rating Scale) results (reduced compared to the baseline scores) evaluated by independent expert panels and blinded investigators, we were able to see the wrinkle improvement of the group.

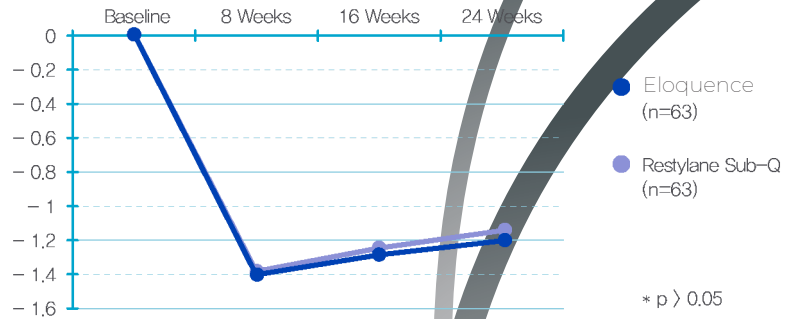

Figure 1. WSRS mean value change at 8, 16 and 24 weeks compared to baseline assessed by blinded investigators.

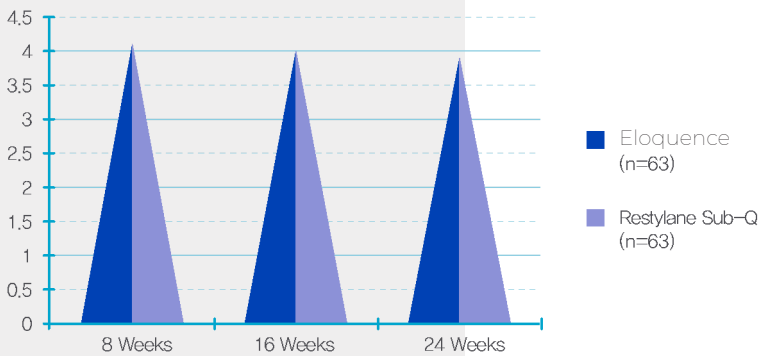

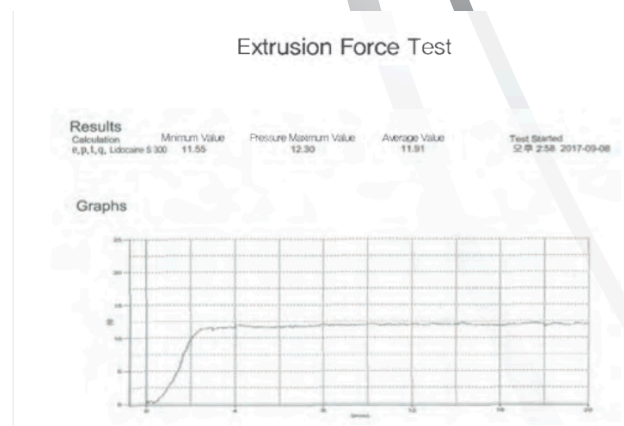

Figure 2. GAIS mean values at 8, 16 and 24 weeks evaluated by subjects

Participant Self- Satisfaction Assessment

Although there was no statistically significant difference in evaluating the satisfaction of the treatment with the tester and the subject's GAIS(Global Aesthetic Improvement Scale), in general, the satisfaction level of the test group was similar or slightly higher than that of the control group.

Safety Assessment

No major abnormalities were reported, and slight abnormal responses from medical devices, such as slight swelling and pain for 2-3 days, were all recovered without any special treatment. There were no signs of abnormal vital signs, physical examinations, or blood tests.

Enhance your features with Eloquence. Plump those lips, tighten your skin and accentuate your cheekbones with CE certified filler for any face. Be your own kind of beautiful with a little help from our tried and tested dermal fillers, aiming to rejuvenate your features.
